			<p>Preferably made in USA Model: TELECRIB TRIPOD KIT (CTC-6004) struts are a lightweight, compact, telescoping stabilization tool designed for rescuer & patient safety during extrication, the only rescue company to manufacture struts, infused composite material, making the tripod struts about half the weight of steel struts & 4 times as strong. Most steel struts have a maximum working load of 4,000 lbs. The tripod struts have a max working load of 18,000 lbs. with a greater than 2:1 safety factor. Because they are composite, they are nearly impervious to environmental or chemical corrosion, do not conduct electricity, and have exceptional impact resistance. If you need lifting capabilities, our removable Strut Jack fits on any tripod strut, turning it into an 8,000 lbs. ram. Thousands of fire-rescue departments across the US and Canada trust Struts to stabilize their most dangerous wrecks. This kit comes with one short and three long struts to make a 2 person, OSHA compliant tripod. Includes all of the accessories for both extrication stabilization and a confined space rescue platform without taking up any additional compartment space.</p>
